Make checks payable to the order of Walter S. Logan, Treasurer, and forwarded to the office of the company, 27 William Street, New York.

The titles have been carefully examined and approved by LOGAN, DEMOND & HARBY, Attorneys-at-Law, 27 William Street, New York, and their opinion has been fully confirmed by the judgment of the Supreme Court of the Republic of Mexico.

"I can find six United Verdes on the Greene Consolidated properties. I believe the stock of the company is worth \$100 a share. I will not sell mine at any price."—GEORGE A. TREADWELL, Waldorf-Astoria, New York, and Phoenix, Arizona. "I believe it is the biggest self-fluxing copper proposition in the world. We can make copper at four cents a pound and the ore bodies seem to be practically linexhaustible."—GEORGE MITCHELL and Cananea, Sonora, Mexico.

"I have examined almost every great mine in the world, and, unless it be the Gold Mines of the Rand, I have never seen a more valuable mining property."—MILES W. GIBBONS, 11 Broadway, New York.

"I recently visited the Greene Consolidated Mines in Northern Sonora. I had read Treadwell's report and thought he must be mistaken in some of the things he states. I found he was mistaken, but not as I supposed. He stated only half the truth. The mines are even higger and more valuable than he has stated them to be."—WILLIAM P. BLAKE, Professor of Mining Engineering in the University of Arizona, address New Haven, Connecticut, and Tucson, Arizona. "The mines are very fine indeed—far beyond my anticipation. The mineral occurs under excellent conditions. There is a great zone of faulting and shearing extending the entire length of the property which is thoroughly impregnated with every kind of copper ore."—ROBERT T. HILL, of the United States Geological Survey, Cosmos Club, Washington, D. C.

the United States Geological Survey, Cosmos Club, Washington, D. C.

"I found the property not only all that it has been represented, but so much better that I not only congratulate myself, but every other shareholder on his investment. They are by common consent the greatest and most valuable copper mines yet discovered, and with proper equipment and management will yield handsome profits to the shareholders. In the light of the present development of the property and the steadily increasing value of the ores as the work of opening these wonderful mines progresses, the report of Professor Treadwell of November I last seems modest in the extreme. Although I am a layman, I ventue this remark because the development of the mines has now reached that stage that does not re aire an expert to understand the enormous deposits and value of the one. I no hos line... ay that in my judgment and in the judgment of all who have seen the property, we have a bonauga of no small proportions. I am so fully satisfied of this that I shall not only substantially fiveness my own investments, but I shall advise my friends to do the same thing, and in doing so I am sure I will be doing them a positive favor."—GENERAL THOMAS H. ANDERSON, United States Attorney of the District of Columbia, Washington, D. C.

"Now that I have seen the mines and breathed the beautiful invigorating air of the Cananeas, I know that Dr. McCullom of New York, whom I met at Nogales, was right when he said that those mountains would, in the near future, be the largest and best mining camp on this continent."
